ACKNOWLEDGEMENTS

The Statistical Office acknowledges the conscientious efforts of the field staff of the many units of the National Park System. Without the effort of the park staff to count, record, and report the data summarized here, a statistical report of this quality would not be possible. These public use data are collected and analyzed monthly. A program of park audits is conducted to insure accuracy.

The gathering and publication of these statistics is undertaken in furtherance of Public Law 88-29, "An Act to promote the coordination and development of effective programs relating to outdoor recreation" and related legislation.

Statistics for management and planning are produced by several offices within the National Park Service. These other important sources are:

Timely, reliable, and useful information is fundamental to effective management and planning of the National Park System. This annual report is a general summary of visitation records for the year. Comments or requests for additional statistical information about this publication should be addressed to:

DISCUSSION

METHODS

The visitation statistics in this report are collected monthly by those areas of the National Park Service that report visits. This information results from the application of a variety of methods ranging from visual counts to the use of electromagnetic traffic counters. In each area of the park system, a method of gathering public use data is selected to preserve a balance between cost and accuracy. Many problems complicate the counting effort such as "open" parks which have multiple, random access points, irregular park boundaries and boundaries which include residencies or even small population centers. In such cases, local estimates are designed to adjust for the circumstances; therefore, the reports of "recreational" use are derived from a variety of counting procedures. Visitor surveys are periodically conducted to correct the counts for changing patterns of travel and public use.

The statistical data reported here are constantly subject to study, verification, correction, and improvement. The guidelines for National Park Service statistical policy and standards are specified in the Reports Management Handbook, NPS AM-5. In this context, the National Park Service attempts to serve the many interests in outdoor recreation travel in America. We believe these data to be among the very best indicators of their kind. The data reported here are suitable for most general purposes and are comparable over time; users should always pay special attention to footnotes when making comparisons.

1980 CHRONICLE

This synopsis of 1980 covers a variety of factors which seemingly influenced general outdoor recreation and vacation travel and, in particular, public use of units administered by the National Park Service. Figure 1 represents National Park System visitation levels in 1980 and 1979 compared with 1978, the latest year which can be considered "normal" in that there was no oil embargo (1973-1974), no Bicentennial celebrations (1976), no gasoline shortages (1979), and no economic turmoil of recent proportions (1980). Figure 1 clearly depicts that, despite prohibitive travel cost increases, 1980 represents a partial recovery from the 7.6% decline in 1979.

The first sign of difficulty for travelers began in February as the prime interest rate began to climb. For those who wanted to "go now, pay later" for a vacation or to replace/repair the family car before taking a long-distance auto tour, the cost of borrowing became a problem. This and other impacts were felt by April as the prime reached 20%, personal income sunk to the '73-'74 low, overall consumer spending declined, and first-quarter prices rose at an 18% annual percentage rate. The coincident timing of these conditions was especially damaging to travel plans and expected tourism industry revenues alike.

At last in May, the prime turned downward. Then--nature took over. Mt. St. Helens' eruptions worsened and brought travel in many parts of the affected region to a halt. Outdoor vacations in the Pacific Northwest were cancelled by many and public use volume remained down for the remainder of the year. Late in May a heat wave formed and throughout the summer, engulfed large areas of the southwest, southern and middle plains states. Visitation fell, especially at water based areas, when the accompanying drought lowered water levels. The heat took its summer toll, but that weather effect on public use volume in 1980 was partially relieved by mild temperatures throughout the country during the fall and winter.

Even as gasoline remained plentiful during the peak season and prices leveled off during the second quarter, consumption dropped: 7% off by the end of the second quarter, 6% off for the year. Although long distance driving was clearly down, the recovery of public use of parks from the previous year perhaps indicated shorter trips and a more regional base of use versus the historical, long-distance national base.

Any impact on disposable personal income impacts discretionary spending for vacation travel. The heat wave problem, therefore, packed a double punch. First, the direct impact on travel mentioned before. Then, the indirect impact from agriculture which came later in the year (and even into early 1981) as a jump in food prices. The 1980 heat wave resulted in crop and poultry losses, early livestock slaughter, and a disappointing fall harvest. Yields were somewhat higher during the generally temperate winter quarter.

As the June-August peak vacation season ended, the prime interest rate started upward again. Suffering a 26% decline in 1980, the automotive industry rode out its worst year in history. The costs of operating a car rose 18%, general travel costs rose 21%, air fares up 30%; nevertheless, public use of the national parks was up 4.4%.

1980 ended on several grim notes. The Iraq-Iran war threatened gas supplies for next year's recreation travel. Unemployment intensified. The prime interest rate climbed to an unprecedented 21.5%. The composite consumer price index closed at 258.7, up 12.5% for the year; some of its elements were heart-stoppers: food away from home, 281.8, up 10.5%; public transportation, 271.8, up 24.1%; homeownership, 337.5, up 16.9%; fuel oil, coal, and bottled gas, 587.0, up 20.0%; private transportation modestly advanced to 260.8, up 14.3%. The European recession was deepening. Travel plan indicators remained as low as they had been all year and consumer confidence sagged.

Table 1 shows last year's public use forecast, actual use, our error and next year's forecast. Our consensus is for a 4.4% increase in 1981. Early 1981 rural road mileage figures indicate 4.4% is a conservative estimate. Other suggestions of optimism appear along the otherwise uncertain economic horizon. Gasoline will be plentiful and decontrolled prices will face consumer resistance. Enticing travel packages are being touted at all price levels. The anticipated tax cut could influence the consumer's decision to "pay as you go," and the overall key word for a hopeful travel and tourism industry is "go."

SUMMARY OF FIGURES

Public use of National Park Service (NPS) units has been down for the 1979-1980 two-year period. The downturn began in May 1979 with no recovery until the following May (1980). Figure 1 graphs recreation visits by month for each of the three years 1978 through 1980 and clearly demonstrates the downturn and its magnitude. The contraction can be viewed from different perspectives in Figures 2 and 3. Figure 2 shows annual visits for both recreation and non-recreation use. Each point on the vertical scale represents the total visits for the twelve-month period ending in the month shown on the horizontal scale. Figure 3 utilizes the same principle as Figure 2 but shows the percent change between the twelve-month period ending in the month shown and the corresponding twelve month period for the previous year.

Visitation to NPS units has been growing throughout the past decade, mainly attributable to the addition of parks in urban areas. The gradual shift in number of NPS units from rural to urban can be seen in Figure 4. For the presentation of this figure, "urban" refers to combined numbers of urban and suburban parks, "rural" refers to combined numbers of rural and remote parks, "outlying" contains no other category. The impact of this shift is illustrated in Figures 5 and 6 which show, respectively, percent of parks in rural and urban locations, and percent of visits to these areas. Although only 25.5% of the parks are in urban and suburban locations, they account for 39.1% of all visits. In contrast, 58.2% of the parks comprising the rural and remote locations account for only 33.5% of the visitation.

The gradual increase of number of overnight stays in NPS parks over the past ten years is traced in Figure 7. Overnight stays dropped in 1979 along with general visitation. The overnight stays decrease heavily impacted the parks farther from the population centers, as those parks are where overnight accommodations are more heavily concentrated. Real and anticipated gasoline shortages in 1979 particularly and significantly affected the use of recreation vehicles. Recreation vehicles had emerged as the more predominant mode of overnight stay over tent in the late 1960's. With gasoline in short supply and prices climbing ten years later, recreation vehicle use dropped drastically and did not recover much in 1980 when every other visitor use category was recovering well.

TABLE 1. LAST VISITATION FORECAST, ACCURACY, AND
 NEXT FORECAST BY LOCATION
 (PERCENT CHANGE OF RECREATION VISITS)

| | LOCATION | | | | | TOTAL |

Affiliated areas, not part of the system

DEFINITIONS

ATTENDANCE. See VISITATION.

BACKCOUNTRY. One or more primitive or wilderness areas in a park reached primarily by hiking, horseback, or, where permitted, off-road vehicles.

CAMP. n: A place of temporary or recreational outdoor accommodation for persons remaining outside of permanent lodging for periods of one night or longer; vi: to remain outside of permanent lodging for periods of one night or longer.

CAMPGROUND. An area of land designated and developed for use as a camp.

CAMPSITE. An area of land for a single camp within a campground.

CLASSIFICATION. The differences in the classifications are generally reflected in the titles listed below. A detailed description of each classification may be found in the publication, Index, National Park System and Related Areas, 1979, (biannual).

| | | | |
|----------------------------|---------|---|-------|
| National Battlefields | (NB) | National Parkways | |
| National Battlefield Parks | (NBP) | National Preserves | |
| National Battlefield Sites | (NBS) | National Recreation Areas | (NRA) |
| National Historic Sites | (NHS) | National Rivers (Scenic, Recreational, and Wild) | (NR) |
| National Historical Parks | (NHP) | National Scenic Trails | (NST) |
| National Lakeshores | (NL) | National Seashores | (NS) |
| National Memorials | (NMEM) | National Capital Parks | (NCP) |
| National Memorial Parks | (NMEMP) | National Mall | |
| National Military Parks | (NMP) | National Visitor Center | |
| National Monuments | (NM) | Parks - Other | |
| National Parks | (NP) | White House | |

CONCESSIONER. Private company or individual granted the privilege of providing facilities and services considered necessary by the National Park Service for accommodating visitors.

CONCESSIONER CAMPGROUND. An element of a concessioner operation involving services for overnight camping, land for camping, or equipment for camping.

CONCESSIONER LODGING. Overnight facilities such as hotels, motels, cabins, cottages, trailer villages, and trailer rental.

MISCELLANEOUS OVERNIGHT STAY. Any overnight stay not otherwise defined.

NATIONAL PARK SERVICE. An agency of the Department of Interior (DOI) which administers more than two dozen types of federal land, nationally significant for their scenic, natural, scientific, historical, or archeological interest (see CLASSIFICATION). The agency was established as a bureau of the DOI by Act of Congress, August 25, 1916. The National Park Service does not administer National Forests (United States Department of Agriculture/Forest Service), Wildlife Refuges (United States Department of Interior/Fish and Wildlife Service), or a variety of other federal lands available for public use.

NONRECREATION VISITS. Reportable nonrecreation visits include visits by: (a) persons going to and from inholdings; (b) through traffic; (c) tradespeople with business in the park; (d) government personnel (other than Park Service employees) with business in the park.

Nonreportable nonrecreation visits are the entries into the park by Park Service employees, their families, concessioner employees, and NPS contractors. (See RECREATION VISITS and TOTAL VISITS.)

OUTLYING AREA PARK. A statistical definition for park located in a Standard Metropolitan Statistical Area of less than one million population.

OVERNIGHT STAY. The passing of one night within-park by a visitor.

PARK. 1. Abbreviated or informal reference to any lands unit administered by the National Park Service and named as an entity. 2. Part of a classification title commonly denoting a larger and more complex unit of the National Park System (see CLASSIFICATION).

RECREATION VEHICLE. Any enclosed vehicle used for camping which is more elaborate than a simple truck or car, such as pickup trucks with camper bodies, pop-up tent trailers, travel trailers, buses, motorcoaches, mobile homes, etc.

RECREATION VISIT. The entry of any person onto lands or waters administered by the National Park Service for recreation purposes (see TOTAL VISITS and NONRECREATION VISITS).

REGION. A National Park Service managerial subdivision. National Park Service Regions include the following states:

Mid-Atlantic - DE MD PA VA WV
Midwest - IA IL IN KS MI MN MO NE OH WI
National Capital Parks - DC Part of MD
North Atlantic - CT MA ME NH NJ NY RI VT
Pacific Northwest - AK ID OR WA
Rocky Mountain - Part of AZ CO MT ND SD UT WY
Southeast - AL FL GA KY MS NC PR SC TN VI
Southwest - AR Part of AZ LA NM OK TX
Western - AZ CA HI NV

REMOTE AREA PARK. A statistical definition for a park which requires special travel arrangements to reach.

RURAL AREA PARK. A statistical definition for a park outside a Standard Metropolitan Statistical Area which is accessible by paved highway, scheduled air service, or commercial marine transportation.

SERVICE PERSONNEL. (a) Employees of the Service who are assigned to the park or are visiting the park in connection with their duty assignments; (b) NPS contractors, concessioners, cooperating associations; (c) the households of Service employees resident in the parks. All such "Service personnel" are not reportable as public use.

SUBURBAN AREA PARK. A statistical definition for a park located outside of the central city but within a Standard Metropolitan Statistical Area of over one million population.

TENT. A portable lodge of material stretched and sustained by poles; used for shelter, especially by park visitors in tent campsites or backcountry areas. Tent camping statistics include overnight stays in designated tent campgrounds.

TOTAL VISITS. Sum of recreation visits and nonrecreation visits (see NONRECREATION VISIT and RECREATION VISIT).

URBAN AREA PARK. A statistical definition for a park located within the central city of a Standard Metropolitan Statistical Area.

VISIT. The entry of any person, except Service personnel, onto lands or waters administered by the National Park Service. Visits may occur as recreation visits or nonrecreation visits.

VISITATION. The total number of persons entering and using a recreation area over a specified period of time.

VISITOR. Any person, except Service personnel, who enters the lands or waters administered by the National Park Service.

FOOTNOTES

* Less than 50 visits or overnight stays

1. The following areas' data started later than January 1979:
Lowell NHP, January 1979; Roger Williams NMem, January 1979; Grant-Kohrs Ranch NHS, January 1979; Klondike Gold Rush NHS, Seattle, June 1979; Fort Scott NHS, June 1979; Edgar Allen Poe NHS, August 1980; Upper Delaware Scenic and Recreational River, January 1980; Chattahoochee NRA, January 1980; Eisenhower NHS, June 1980.
2. Data for North Cascades NP, Ross Lake NRA and Lake Chelan NRA are shown combined; no breakdown is available.
3. Theodore Roosevelt NMemP and Badlands NM redesignated National Parks, November 1978; City of Refuge NHP renamed Pu'uhonua o Honaunau NHP, November 1978; Chalmette NHP renamed and redesignated Jean Lafitte NHP and Preserve, November 1978; Channel Islands NM redesignated National Parks, March 1980; Biscayne NM redesignated National Park, June 1980; Moores Creek NHP redesignated National Battlefield, September 1980; Glacier Bay NM and Katmai NM redesignated National Parks, December 1980; Mount McKinley NP renamed Denali NP and Gran Quivira NM renamed Salinas NM, December 1980; Chaco Canyon NM renamed and redesignated Chaco Culture National Historical Park, December 1980.
4. Overnight stays reflect use by persons occupying dwellings owned by NPS but leased back to occupants.
5. The number of visits in 1980 are not comparable to 1979 numbers due to changes in counting procedures, partial or temporary closure, or opening of additional areas.
6. Visits discontinued seasonally.

As the nation's principal conservation agency, the Department of the Interior has basic responsibilities to protect and conserve our land and water, energy and minerals, fish and wildlife, parks and recreation areas, and to ensure the wise use of all these resources. The department also has major responsibility for American Indian reservation communities and for people who live in island territories under U.S. administration.
