INTRODUCTION

National Park Service professionals are dedicated to their fundamental mission as protectors of our resources for future generations, archivists of the nation's history, and providers of educational and leisure time opportunities. Timely, reliable, and useful information is fundamental to effective management and planning.

The Public Use Statistics Program Center acknowledges the conscientious efforts of field staff of the many areas of the National Park Service. Without the effort of park staff to count, record, and report the public use summarized here, a statistical report of this quality would not be possible. A program of collecting and analyzing monthly public use is combined with continuous auditing of park counting procedures to ensure consistency and accuracy of data. The footnotes at the end of this report describe conditions at parks which may require important adjustments for certain applications of these data.

The gathering and publication of these statistics is in accordance with Public Law 88-29, "An Act to Promote the Coordination and Development of Effective Programs Relating to Outdoor Recreation" and related legislation. The definitions at the end of this report were initially outlined by "A Uniform Method for Measuring and Reporting Recreation Use on the Public Lands and Waters of the United States", unpublished guideline of the Recreation Advisory Council Study Committee Number Two, April 1965.

Comments or requests for additional public use information should be addressed to:

The agency was established as a Bureau of the DOI by Act of Congress, August 25, 1916. The NPS does not administer National Forests (United States Department of Agriculture/Forest Service), Wildlife Refuges (United States Department of Interior/Fish and Wildlife Service), or a variety of other lands available for public use.
