# INTRODUCTION

Table 1: 2004 Recreation Visits by Type of Area

National Park Service professionals are dedicated to their fundamental mission as protectors of our resources for future generations, archivists of the nation's history, and providers of educational and leisure time opportunities. Timely, reliable, and useful information is fundamental to effective management and planning.

The Social Science Program's Public Use Statistics Office acknowledges the conscientious efforts of field staff of the many areas of the NPS. Without the effort of park staff to count, record, and report the public use summarized here, a statistical report of this quality would not be possible. A program of collecting and analyzing monthly public use is combined with continuous auditing of park counting procedures to ensure consistency and accuracy of data. The endnotes at the end of this report describe conditions at parks that may require important adjustments for certain applications of these data.

The National Park Service cares for special places saved by the American people so that all may experience our heritage. National parks help define who we are as a nation and where we have come as a people. Parks show us natural and historical wonders that grace our lives and provide us with cherished memories.
